

BEIS YAAKOV JEWISH HIGH SCHOOL ACADEMY

Geography Programme of Study 2024-25

Our KS3 Curriculum

Pupils are taught a broad range of topics to help them understand the world around them. We aim to teach them that they are global citizens with a role to play in protecting our planet. All pupils will study topics such as rivers, natural disasters, population and will have the opportunity to develop their geographical skills through class study and field work.

We aim to **foster a sense of wonder and enlighten students about the world** by becoming **independent critical thinkers**. Through our Geography curriculum, students will **learn about the world's diversity of environments and cultures**. They will **gain a greater understanding of the complexity of both human and physical processes**. They will also **learn how mankind is changing our planet and how we can minimise the impact of this change**. We aim to help students to understand the complexity of the natural and human world and to be able to draw together evidence from a range of sources to form their own informed, evidenced opinions.

GEOGRAPHY CURRICULUM AREA STAFF 24 - 25

Mrs K Schwartz
